

# TMD IS BUILDING GROUNDS TO THE HIGHEST STANDARDS

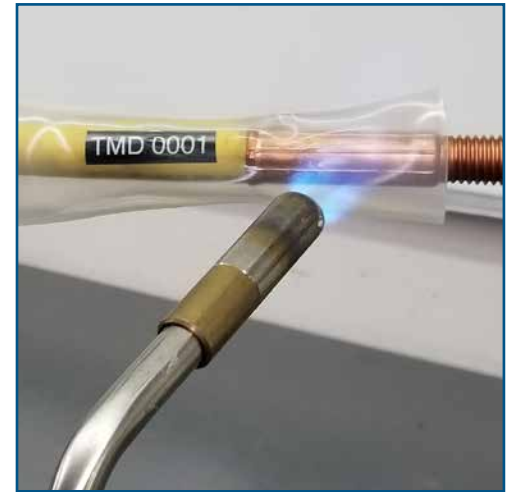

Our equipment allows for better control over the final crimped dimensions.

TMD maintains large stocks of grounding components including clamps, cables and ferrule in all types and styles.

Our press adjusts to the final-compressed outside dimension as designated by each cable and ferrule manufacturer. Statistics are available for each crimp.

TMD has the ability to serialize every personal protective grounding assembly.

# H-RATED CLAMPS

## SAFELY MANAGE HIGHER VOLTAGES

FULLY-CUSTOMIZABLE ASSEMBLIES

mix & match

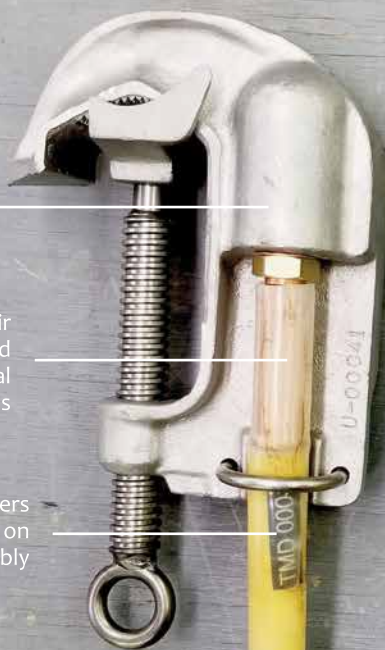

SALISBURY

HASTINGS

Large 5H-7H Rated "C" Clamps for buses up to 6" and >#6 gauge conductors

TMD can test, repair and maintain new and in-service personal protective grounds

Serial numbers are applied on each assembly

Strong bronze 5H-Rated Clamp to attach on the ground side

Heat shrink is applied for moisture protection and additional strain relief

Shrouded ferrules give additional stress relief and moisture protection

TMD is your manufacturer for custom personal protective grounding assemblies.
